Morgan Rivera

Computer Science Student | Software Engineering Intern Candidate

Bakersfield, CA | morgan.rivera@example.com | (661) 555-0142
Portfolio: example.com/morgan-code

PROFILE

Computer science student building practical web applications with TypeScript, React, Python, and SQL. Interested in internship opportunities with local teams working on agriculture, clean energy, and community-focused software.

EDUCATION

Central Valley Example University — Expected May 2027

Bachelor of Science in Computer Science | GPA: 3.6 / 4.0

Relevant coursework: Data Structures, Databases, Software Engineering, Human-Computer Interaction

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, SQL, HTML, CSS

Tools and frameworks: React, Node.js, SQLite, Git, GitHub, Playwright, pytest

Practices: REST APIs, accessible interfaces, automated testing, code review

EXPERIENCE

Student Software Developer | Community Garden Lab — Sep 2025 - Present

Fictional student-led project team | Bakersfield, CA

- Built a React and TypeScript application to coordinate garden volunteer shifts for 12 demo volunteer profiles.
- Implemented a Node.js API and SQLite database for schedules, availability, and sign-up records.
- Created 14 automated browser tests covering sign-ups, form validation, and mobile navigation.
- Worked with a four-person student team through weekly planning and pull-request reviews.

SELECTED PROJECTS

Field Notes Dashboard — Jan 2026 - Apr 2026

Python, SQLite, pytest

- Created a dashboard that imports sample soil-moisture readings from CSV files and summarizes daily trends.
- Added checks for missing values, invalid dates, and duplicate readings, with unit tests for each case.

Sunlight Energy Tracker — May 2026 - Aug 2026

React, TypeScript, CSS

- Built a responsive interface for exploring synthetic household solar-production data.
- Added keyboard-accessible filters and a light/dark theme with saved display preferences.

COMMUNITY

Peer Coding Mentor | Campus Code Circle — Feb 2026 - Present

Helped six first-year students practice Python fundamentals and Git workflows in biweekly study sessions.
